ABOUT ME

I am a fourth-year Information Technology student seeking an internship to gain real-world experience and grow professionally. I also have experience working as a freelancer, which has helped me develop discipline, adaptability, and strong communication skills. I enjoy learning new things, collaborating with others, and taking on challenges that help me improve both my skills and confidence. I am motivated, responsible, and open to feedback, and I am eager for an opportunity where I can contribute, learn from a team, and further develop skills that will prepare me for my future career.

TECHNICAL SKILLS

- **Web Development:** Basic experience in building and maintaining websites using Vue.js, HTML, CSS, JavaScript, and Firebase
- **Programming & Scripting:** Familiar with JavaScript, Python, SQL, Bash, EJS, and handling structured data formats such as JSON and Markdown
- **Tools & Platforms:** Comfortable using Git and GitHub for version control and collaboration
- **Languages:** English and Tagalog
- Willingness to learn and adapt quickly

PROJECT EXPERIENCE

Barangay Information System

- Created a Vue.js + Firebase system for barangay data and service digitization.
- Integrated role-based dashboards, chatbot (Cohere), and request management.
- It be use to boost community access to digital governance services.

SafePath – Bullying Complaint System

- Built a web-based platform with chatbot and sentiment analysis for safe, anonymous.
- Guided users through reporting via AI-driven severity classification (mild, severe, neutral).
- Improved student engagement with dynamic response handling.

LiftUp – Mental Health Platform

- Developed AI-powered platform with anonymous chat, forums, and wellness resources.
- Promoted mental health awareness through tech and community support.

E-Log – Flood Monitoring System

- Developed an IoT-based flood monitoring system using a Orange Pi, water level sensor, and a professor-developed programming language (Xianfire) for real-time flood level detection.

EDUCATION

Bachelor of Science in Infotmation Technology

Mindoro State University Calapan Campus

- Dean’s Lister

CERTIFICATIONS & RECOGNITION

- CEFR English Proficiency: Scored 90/100, indicating a level between C1 (Advanced) and C2 (Proficient)
- Proficient in network addressing, subnetting, and VLAN configuration
- Hands-on experience in optimizing network reliability and performance
- Introduction to Visual Graphic Design (TESDA Online Program)
